

**Errata for the publication:  
“APEX: Automated Parameter Exploration for Low-Power Wireless Protocols”**

**Publication details:**

Mohamed Hassaan Mohamed Hydher, Markus Schuss, Olga Saukh, Kay Römer, and Carlo Alberto Boano. *APEX: Automated Parameter Exploration for Low-Power Wireless Protocols*. ACM Transactions on Sensor Networks, Vol. 21, No. 6, November 2025. DOI: 10.1145/3770918

**Correction to Table 1 (RPL parameters):**

Location in the published article: Page 5 (60:5), Table 1 (“LPW protocols and parameters considered in this work, and their respective range of possible values”).

Description of the error: The possible values for parameter *Rank\_threshold* for the RPL protocol was incorrectly reported in Table 1. The published version lists:

$$Rank\_threshold = [4, 8, 12, 16]$$

The correct values used in the experiments are:

$$Rank\_threshold = [1.5, 3, 6]$$

Note that this correction affects only the parameter values reported in Table 1. All experimental results, analyses, and conclusions remain unchanged.
